

SUMMARY

A dedicated Flutter developer with experience in hybrid mobile application development, specializing in Firebase Realtime Database integration and MVVM architecture. Proficient in state management with the Provider package, responsive UI design, and API integration. My projects, including the Moviepedia app, highlight my abilities in Flutter development, Firebase database management, and creating user-friendly, data-driven applications.

TECHNICAL SKILLS

Programming Languages: Dart, Java, HTML+CSS

Tools and Technologies: Flutter, Firebase, RESTful APIs, Git

Frameworks: MVVM architecture, Provider for state management

Database: Firebase Realtime Database, SQLite

Relevant Coursework: Data Structures & Algorithms, Mobile App Development, Software Engineering

- PROJECTS
- Moviepedia App

A movie information app that uses API integration to provide real-time data on popular movies.

- Implemented Firebase Realtime Database for storing user favorites.
  - Designed responsive UI using Flutter widgets and the Provider package for state management.
  - Technologies Used: Flutter, Firebase, REST API.

•ChatApp

Real-time messaging app that supports image sharing and message reactions.

- Built a chat feature using Firebase as a backend for real-time communication.
  - Implemented a user-friendly UI that supports multimedia content and reactions.
  - Technologies Used: Flutter, Firebase, Dart.

- EXPERIENCE
- Freelance Flutter Developer

Self-employed

2023 - Present

Remote

- Developed custom hybrid applications for clients, handling complete lifecycle from requirement analysis to deployment.
  - Focused on seamless API integration and ensuring data consistency in real-time applications.

•Technical Team Member

Google Developer Group

Oct 2024 - Present

Hybird

- Collaborated with team members to organize and execute tech workshops, events, and seminars aimed at fostering community learning..
  - Contributed to technical setup and support for workshops, ensuring seamless event experiences.
  - Actively participated in discussions on emerging technologies and development practices, enhancing community knowledge-sharing
